LIFE19 GIE/BG/000846 SWIPE Project
Successful Wildlife Crime Prosecution in Europe

MAIN INFORMATION

Territorial scope (11): Romania, Serbia, Slovakia, Hungary, Ukraine, Poland, Bulgaria, Bosnia and Herzegovina, Croatia, Spain, Italy

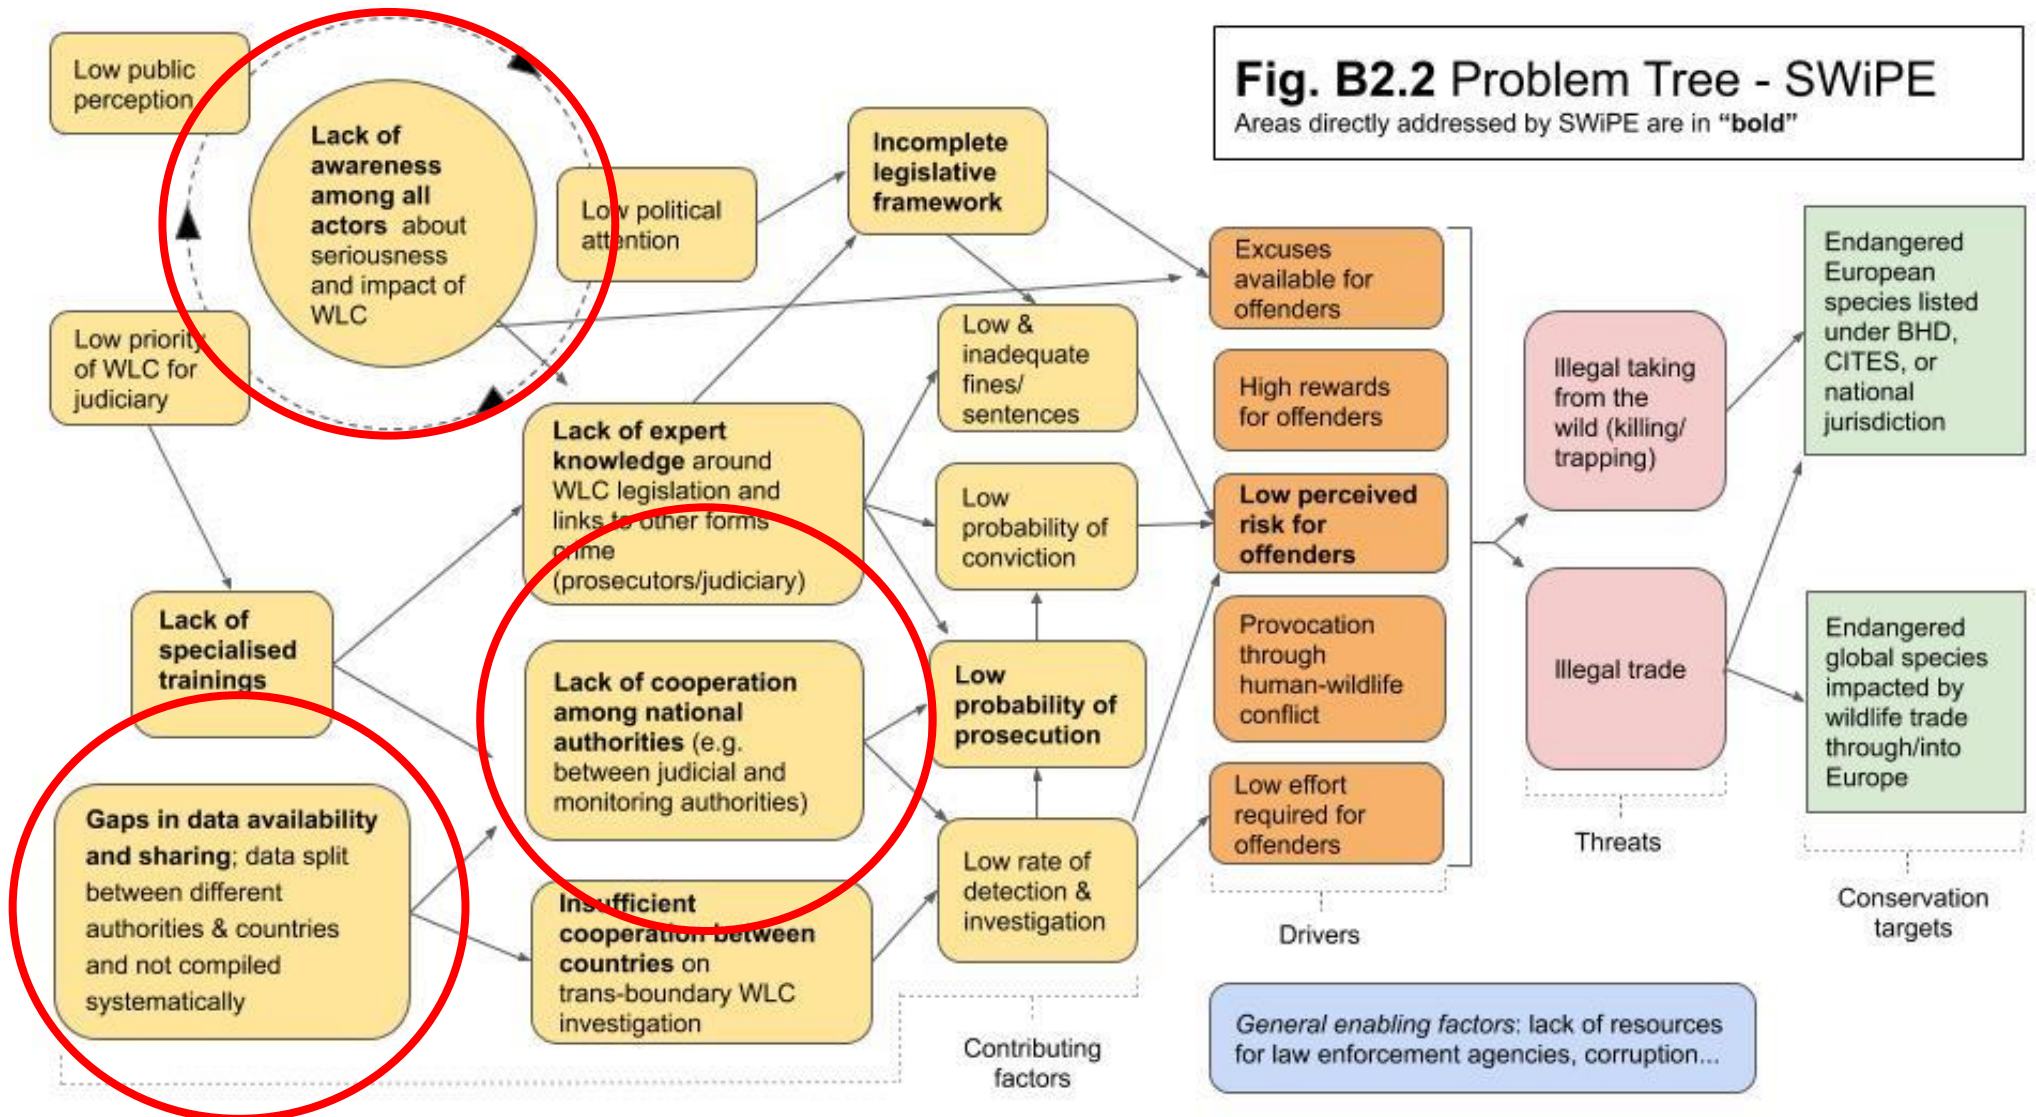

Start date: 01/09/2020

End date: 31/08/2023

Leading partner: WWF Bulgaria

Associated beneficiaries (12): State Attorney's Office of the Republic of Croatia, Flora & Fauna International, Judicial Academy Croatia, WWF Adria in Serbia, WWF Adria, WWF Spain, WWF Hungary, WWF Italy, WWF Poland, WWF Romania, WWF Slovakia, WWF Ukraine

AREAS COVERED BY SWiPE

OBJECTIVES

SWiPE aims to discourage and ultimately reduce illegally killed European wildlife, supporting the recovery of threatened European biodiversity and the health of ecosystems.

PROJECT ACTIONS

A. Preparatory - It provides a foundation to the project, supporting the delivery of all project objectives. The Launch and Stakeholder Engagement Workshop brings together strategic cooperation stakeholders and provides a platform to launch cooperation.

B. Implementation

B1 - B4 focus on the collection, analysis, and accessibility to data and information.

B5 - B9 focus on improving operations and compliance through common learning.

C. Monitoring of the impact of the project actions, including measurement of LIFE performance indicators and socio-economic impact assessment.

D. Public awareness and dissemination of results – informing the general public and stimulate media coverage about examples of cases when WLC has led to conviction with substantial penalties to spread the message that WLC is risky, detrimental, and in need of political attention; networking and technical dissemination to European expert audiences.

E. Project management, including monitoring and Evaluation

TARGET AUDIENCES & STAKEHOLDERS

Primary target audience, with the highest relevance for addressing the problem being: 170 national and regional prosecutors, 220 national and regional enforcement officials and 210 individuals from national CSOs, other WLC experts, staff of national ministries, judges or judicial academies together.

Secondary target audiences have been selected for their potential to support and advocate for increased action, and include 10 mio European citizens and policy makers and decision makers.

Stakeholders - entities that have an active interest in (or are affected by) the issue targeted by the project, including European strategic cooperation partners and the ones participating actively in the project reference panel (ENPE, UNEP, OCLAESP (French Gendarmerie), EUFJE, Birdlife).

EXPECTED RESULTS

Overall Expected Result: The number of investigated and reported wildlife crime cases proceeding to trial has increased by at least 25% due to improved expertise as well as better interagency and cross-border cooperation of responsible authorities.

Expected Result 1: At least 50 European actors in the WLC prosecution chain, including prosecutors, enforcement agencies and NGOs representing 11 focal countries reaffirm commitment to strategic cooperation.

Expected Result 2: In order to establish a baseline and inform policy advocacy, intelligence on WLC from 11 countries has been gathered and analysed in participatory manner, delivering facts on the number and type of investigations and prosecutions, reasons for non-prosecution, and gaps in current practices.

Successful Wildlife Crime Prosecution in Europe

EXPECTED RESULTS (cont.)

Expected Result 3: An effective Europe-wide internet-based information portal has been set up, facilitating the sharing of information, being visited annually by minimum 1000 representatives of investigation and prosecution agencies and other specialists on WLC, and whose maintenance is ensured for at least 5 years after project end.

Expected Result 4: Out of 600 experts trained, 300 prosecutors and representatives of enforcement agencies in 11 countries have significantly increasing their level of knowledge and understanding of the impact of WLC on protected species populations, its links to other criminal activities, and ways of successfully fighting it.

Expected Result 5: 10 Million citizens reached, and 25 exemplary cases of verdicts have been communicated to the general public in order to change the sense of impunity and low risk.

Expected Result 6: Effective project management, supported by robust monitoring and evaluation ensures delivery of objectives and sustainability of project outcomes.

REPLICABILITY AND CONTINUATION

The consortium builds on the results of previous projects and designs interventions. As part of a global network, with **excellent coverage across the EU, FFI, WWF and TRAFFIC partners** can guarantee extension beyond target countries.

The project's **Expert Reference Panel** will further support replication through their existing networks, activities, and events.

At the end of the project a 25% increase in cases proceeding to trial in 11 focal countries compared to the baseline value of 2021 is expected. The increase can go up to 35% during the first three years after the project ended.

A self-sustaining loop with more cases will create more learning opportunities and continue to increase capacities and cooperation of enforcement officials and prosecutors even after the project ended.
